

Mohammed Jawoad

Senior ERP Consultant and Odoo Developer

SAP Business One, SAP S/4HANA, Odoo, ERPNext

Baghdad, Iraq | +964 772 550 1097 | mohammedjawoad@gmail.com | linkedin.com/in/mohammed-jawoad-219a75159

PROFESSIONAL SUMMARY

ERP consultant and developer with 8+ years in IT and ERP, including SAP Business One, SAP S/4HANA, Odoo and ERPNext solutions. Built 7 SAP-integrated applications for a multi-company group, including a consolidated reporting portal for the group finance manager: 7 companies, 54 financial reports automated on SAP HANA, and 23 of 23 closed-month checks matched to the cent. Pairs functional depth in finance, procurement, sales, inventory and production with hands-on development of custom Odoo modules and secure, tested web applications on the SAP B1 Service Layer and HANA that automate approvals, posting and group reporting. Works in Arabic and English.

PROFESSIONAL EXPERIENCE

Al-Rafidain Group | Baghdad, Iraq

Mar 2023 – Sep 2026

SAP Business One Consultant | Group Systems Administrator

Multi-company group spanning pharmaceuticals, airport transport, car rental and family entertainment, running SAP Business One on HANA across 7+ companies.

- Designed and built 7 SAP Business One-integrated web applications for group finance, operations and leadership, replacing legacy reports and manual approval steps (see Projects).
- Led SAP Business One consulting across the group's companies in finance, procurement, sales, inventory and production, taking changes from requirements and solution design through configuration, UAT, go-live and user training.
- Enforced data quality and compliance with Transaction Notification controls, approval procedures, stored procedures, user-defined fields and custom Crystal Reports and SQL reports.
- Deployed and ran the group's portals in production on Windows Server with Caddy, Cloudflare Tunnel, TLS, watchdogs and health checks; administered servers, networking, access, backup and disaster recovery.

Al-Qalab | Iraq

Jan 2022 – Mar 2023

ERPNext Functional and Technical Consultant

- Implemented and optimized ERPNext across Accounting, Buying, Selling, Stock and Manufacturing, translating business processes into configured workflows.
- Gathered requirements with process owners, configured workflows and led testing and UAT; resolved functional, configuration and data issues through go-live.
- Trained end users and produced process documentation, raising adoption, consistency and data accuracy.

NetGate-Iraq | Baghdad, Iraq

Jun 2018 – Jan 2022

Senior System Administrator

- Administered enterprise Windows and Linux servers, virtualized infrastructure and networks, sustaining service availability through monitoring, maintenance, backup and recovery.
- Deployed and upgraded servers and virtualization platforms, and hardened security and access control across the data center.
- Supported ERP and business-application rollouts with configuration, troubleshooting and end-user support.
- Resolved server, operating-system, network, application and database incidents, coordinating with internal teams and external vendors.

PROJECTS

Built for Al-Rafidain Group companies on SAP Business One. Case studies:
github.com/mohammedjawoad-sketch/erp-case-studies

Group Finance Manager Portal | SAP HANA, Node.js, Express, React, TypeScript

- Consolidates Trial Balance, Financial Position, Income Statement and daily sales reports for 7 SAP B1 companies in IQD and USD, in an Arabic-first interface for the group finance manager.
- Automated 54 reports on SAP HANA and matched finance's closed-month statements to the cent in 23 of 23 validation checks.

Operations and Finance Monitoring Platform | SAP Service Layer, SAP Customer Checkout, B1if, PostgreSQL, React

- Replaced 27 legacy reports for the airport-transport company with 20 role-based, bilingual Arabic/English workspaces.
- Secured with 10 access roles, audit-logged evidence exports and certificate-validated connections.

AP Payment Approval Portal (PWA) | SAP Service Layer, Node.js, React, SQL Server, Web Push

- Digitized supplier-payment approval for the pharmaceutical company: the finance team submits requests against open SAP AP invoices, and the finance manager approves or rejects on mobile with push notifications.
- Tracks approved requests through to SAP outgoing payments with a full audit trail.

Finance Posting Portal | SAP Service Layer, Hono, tRPC, React, SQL Server

- Posts journal entries, incoming payments (including partial and cross-branch), fund transfers and commissions to SAP for the car-rental company.
- Adds fleet profit-center reporting, role controls and recoverable drafts.

Fleet and Sales Applications | SAP Service Layer, SAP API Gateway, Crystal Reports, Node.js, React

- Vehicle-accident memo workflow with driver submission, SAP attachments and manager approval.
- Sales and invoice reporting portal with Crystal Reports, Excel and PDF export and role-based permissions.

Smart Enterprise Workspace | React, TypeScript, Vitest, Playwright, GitHub Actions

- Arabic-first unified workspace for the pharmaceutical company covering planning and production, batch tracing, finance, approvals, inventory and executive views, with smart notifications.

CORE SKILLS

SAP	SAP S/4HANA, SAP B1 10.0 on HANA, Service Layer (REST/OData), API Gateway, B1if, SAP Customer Checkout (CCO), Transaction Notification, approval procedures, user-defined fields, Crystal Reports
